In addition to the histological grade of a tumor, its location and extent are major factors in its treatment. Principles of Tumors: A Translational Approach to Foundations, Second Edition, provides a concise summary of translational research on major topics on the various aspects of tumors, especially abnormalities in their cells, their causes and effects on patients.

Principles of cancer immunotherapy - Oncology for Medical Staff.

Benign vs Malignant neoplasms
Malignant (cancer) cells invade neighboring tissues, enter blood vessels, and metastasize to different sites. Time Benign (not cancer) tumor cells grow only locally and cannot spread by invasion or metastasis.

Principles of the new World Health Organization (WHO) classification system for tumors.
